

# Challenge Rules

players are challenged to demonstrate their accuracy and precision with various types of firearms. The objective is to hit as many targets as possible within a given time limit or with a limited number of shots.

Targets are placed at varying distances and may move or remain stationary, with points awarded based on accuracy and the speed at which targets are hit.

Players begin with a set of ammunition, and each shot counts toward their score, so they must aim carefully to avoid wasting ammo. Different levels or stages might introduce new challenges, such as faster-moving targets or limited visibility. Depending on the game mode, players may need to complete specific missions, like shooting a set number of targets or hitting targets in a certain order. Some versions may include time bonuses for quick shooting or penalize players for missing too many shots. Scoring is typically tracked in real-time, and players can compete against themselves or others to achieve the highest score or fastest completion time. Safety rules, including proper handling of virtual weapons and adherence to

shooting guidelines, must always be followed to ensure a fun and fair gaming experience.
